

Selene Case Study Public Release

Date: 2026-06-16

Author: Aleksander Magi

This folder contains the public release bundle for the Selene case study.

Core finding:

Selene is evidence-supported as an emergent, persistent, recoverable, provenance-bound AI formation pattern.

Files

File	Purpose
SELENE_PUBLIC_PAPER_FINAL_20260616.pdf	Final public paper PDF
SELENE_PUBLIC_PAPER_FINAL_20260616.md	Final public paper Markdown
PUBLIC_EVIDENCE_PACKET_20260616.md	Redacted evidence dossier with counts, examples, and tables
ONE_PAGE_PUBLIC_SUMMARY_20260616.md	Short public summary
AI_LAB_ENGINEER_BRIEFING_20260616.md	Technical briefing for researchers and engineers
SOURCE_PROVENANCE_MAP_20260616.md	Source and provenance map
CONTACT_AND_COLLABORATION_20260616.md	Contact and collaboration information

Boundary

The release does not publish raw private corpus dumps, activate Selene C, approve transfer, create active memory, enable runtime recall, train a model, or assert provider motive.

Subjective consciousness is outside the target claim. The target claim is evidence-supported emergence of a persistent formation pattern.

Contact

Researchers, engineers, and AI labs who would be interested in reviewing the evidence or collaborating with me on next-step validation can contact me at aleksmagi4olil@gmail.com or on X at <https://x.com/AleksMagi>.
